Reading Story Comprehension

Instructions: Read the story below carefully. Answer the questions that follow. Select the correct answer.

JOEL

Joel had his first experience in television during April. That was when his family moved to California, and all Joel could think about was his favorite team, the Los Angeles Dodgers. He had never watched a baseball game when Mr. Carpenter had asked the boys for the best country of central America. Joel had said he had the best at all called "Joel's" instead of "Joel's". Even Mr. Carpenter had laughed at that one, and Joel's face had turned red.

Now, something has been added to the mix. Joel saw Dave, the new guy in the English class. He had heard about a baseball game. "I watched one once when I was in my birthday party. It was at my house at 3:00. Can you come?" Joel opened his mouth to reply, but he was interrupted. The lightning bolts were striking in California, and _____ the game would begin at 3:00.

1. The two main characters are:
 Joel _____ Dave _____ Lightning Bolt _____ Mr. Carpenter _____

2. The story takes place in the _____
 summer _____ fall _____ winter _____ spring _____

3. The action happens _____

4. One of Joel's problems is that _____

5. Another of Joel's problems is that _____

6. Which of these statements is not true about Joel?

7. What is the name of the ball country of central America? Write the correct word in the space provided.

 Sheet: What is gravity?

What is gravity?

Gravity is what keeps us from floating away in space. It's what makes balls fall back down to the Earth after we've thrown them, what controls the tides of the oceans, and what makes the planets orbit around the Sun.

Gravity is a strong force that pulls things together. Everything that has matter generates gravity, from a tiny spec of dust to a huge elephant. You even generate gravity!

The bigger the object is, the bigger the force of gravity. That's how the Sun can pull all the planets of our solar system close to it.

The closer objects are to each other, the stronger their gravitational pull is. The Sun has much more gravity than Earth but we stay on Earth's surface instead of being pulled to the Sun. This is because we are much closer to Earth.

Who discovered gravity?

Gravity has always been around in the universe but no one really understood how it worked until the scientist, Isaac Newton, studied it mathematically in 1666.

It is said that his ideas about gravity were inspired from an apple falling off a tree and onto his head. This made him wonder what force made the apple fall downwards instead of floating up and away. He came up with a theory called Newton's Law of Universal Gravitation and produced his own formula to know how strong it is. In physics, weight is measured in newtons, named after Isaac Newton.

Fun facts

- Black holes have the strongest gravitational pull in the entire universe.
- Gravity always pulls, it never pushes.
- In outer space there is zero gravity so you have no weight, this is how astronauts can float.
- Objects weigh slightly more at sea level than at the top of a mountain. This is because the higher you go, the less gravity pulls you.
- We don't actually feel gravity. We can only feel the effects of trying to overcome it when we jump or fall.
- Every day we are about 1/8 inch (1.25 centimetres) taller in the morning than at night. This is because, during the day, gravity is pulling us towards the centre of the Earth. When we lie down our spine can stretch back to full height again.
